

WE'RE SO GLAD YOU'RE HERE

Mark & Nichole

Sharing your photos & videos

Scan the code, or type the address into any browser. It works on any phone, with no app to install and nothing to sign in to.

<https://nichole-mark-photos.vercel.app>

How it works

1

Point your camera

Open the Camera app and hold it over the code. Tap the link that pops up.

2

Add your photos

Tap **Add photos & videos** and pick as many as you like.

3

Watch them land

They appear in our live gallery within seconds, for everyone to see.

Good to know

- ◆ Photos and videos are both welcome, up to 500 MB each.
- ◆ Pick several at once. Three upload at a time so the venue wifi keeps up.
- ◆ Keep the page open until every bar reads **Done**.
- ◆ Your first name is optional. It just labels what you share.
- ◆ iPhone photos are converted automatically. That is the **Converting...** step.
- ◆ Everything shared is visible to every guest with this link, and downloadable from the gallery.
- ◆ The link stays live. Add more tonight, tomorrow, or next week.

If something goes wrong

My camera will not pick up the code

Use the built-in Camera app, hold steady about a hand's width away, and make sure the whole code is in frame. Or just type the address into any browser.

The progress bar is stuck or crawling

Venue wifi gets crowded. Leave the page open and it keeps going on its own. If it will not budge, switch wifi off and use cell data.

It says Failed

Tap **Add photos & videos** and choose the same file again. It picks up from where it stopped rather than starting over.

It says Too large. Max is 500 MB.

That video is over the limit. Trim it in your Photos app and share the shorter clip.

I closed the tab before it finished

Open the link again on the same phone and re-pick those files. Anything already sent is safe.

My photo is not in the gallery

Pull down to refresh the page. New uploads normally appear on their own within a few seconds.

My video shows a play button, not a preview

Normal. Some phones will not hand over a preview frame. The video itself plays fine when tapped.

Nothing loads at all

Check that you are connected to wifi or cell data, then reload. Still stuck? Grab someone from the wedding party.
